Mermaid Showcase

2026-05-20

This self-test document exercises the Mermaid-fence support added to `markdown-pdf.py`. Each section below embeds one diagram of a different Mermaid type. Building this document to PDF verifies that:

1. Every supported diagram type renders as an SVG (not as a syntax-highlighted code listing).
2. Diagrams sit in their original position in the document flow.
3. The cache mechanism avoids re-rendering unchanged diagrams on repeat builds.
4. Mixing Mermaid blocks with prose, code blocks, and math does not confuse the pre-processor.

Build with:

```
make test-mermaid
```

from this `designs/scripts/tests/` directory, or directly via:

```
./designs/scripts/markdown-pdf.py designs/scripts/tests/mermaid-showcase.md
```

A plain code block (not Mermaid) should still render as syntax-highlighted source:

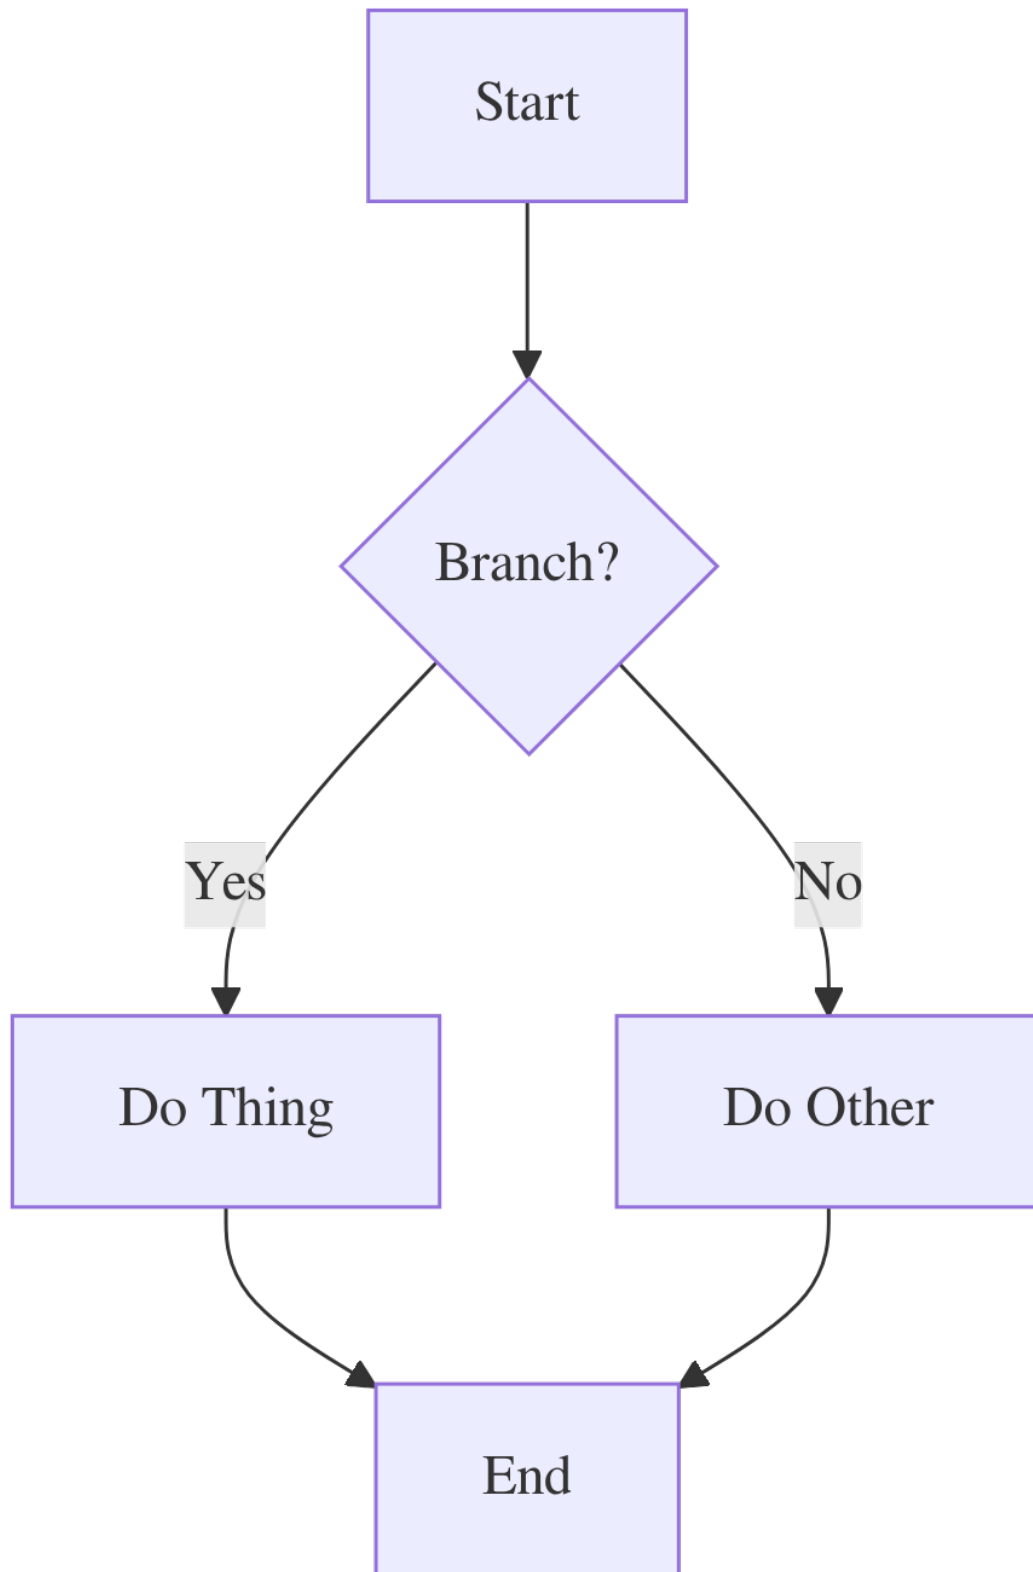

```
def hello():  
    print("not a diagram – just a control")
```

An inline math check (also not Mermaid): $\mathcal{A}(s,d) = s'$.

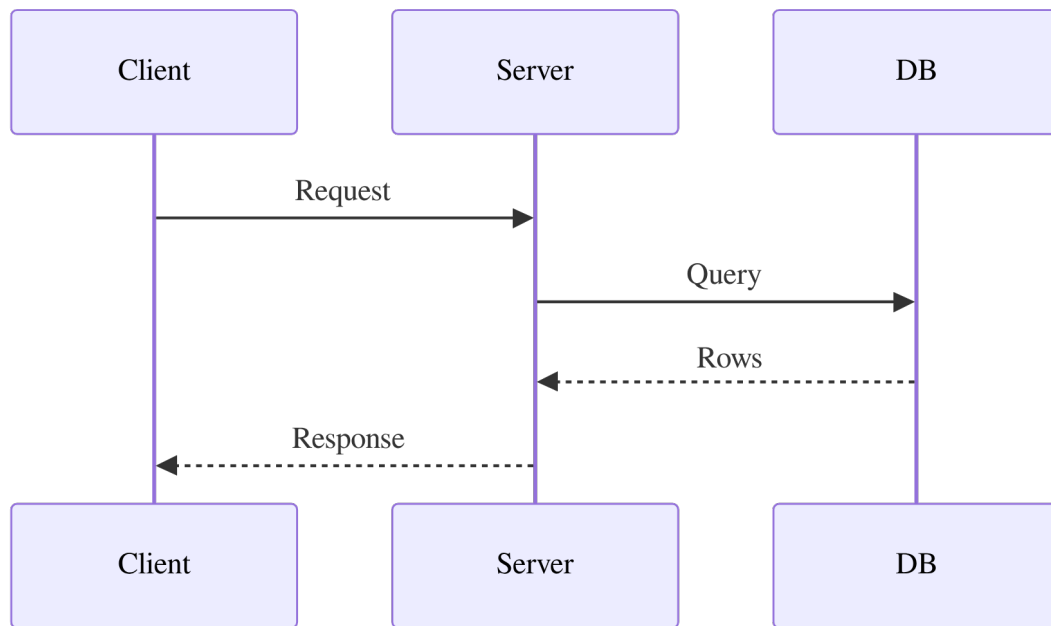

Contents

1. Flowchart
 2. Sequence Diagram
 3. Class Diagram
 4. State Diagram
 5. Entity-Relationship Diagram
 6. Gantt Chart
 7. Git Graph
 8. Pie Chart
 9. Mindmap
 10. Timeline
 11. Sankey Diagram

6. Gantt Chart

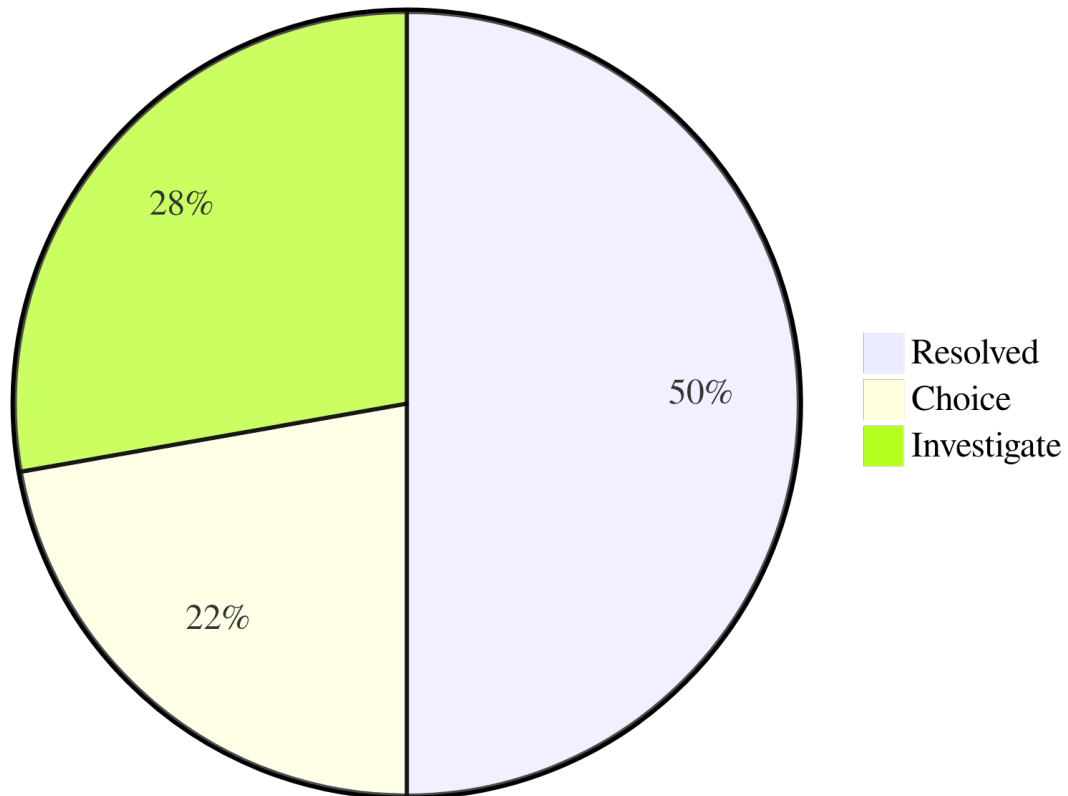

7. Git Graph

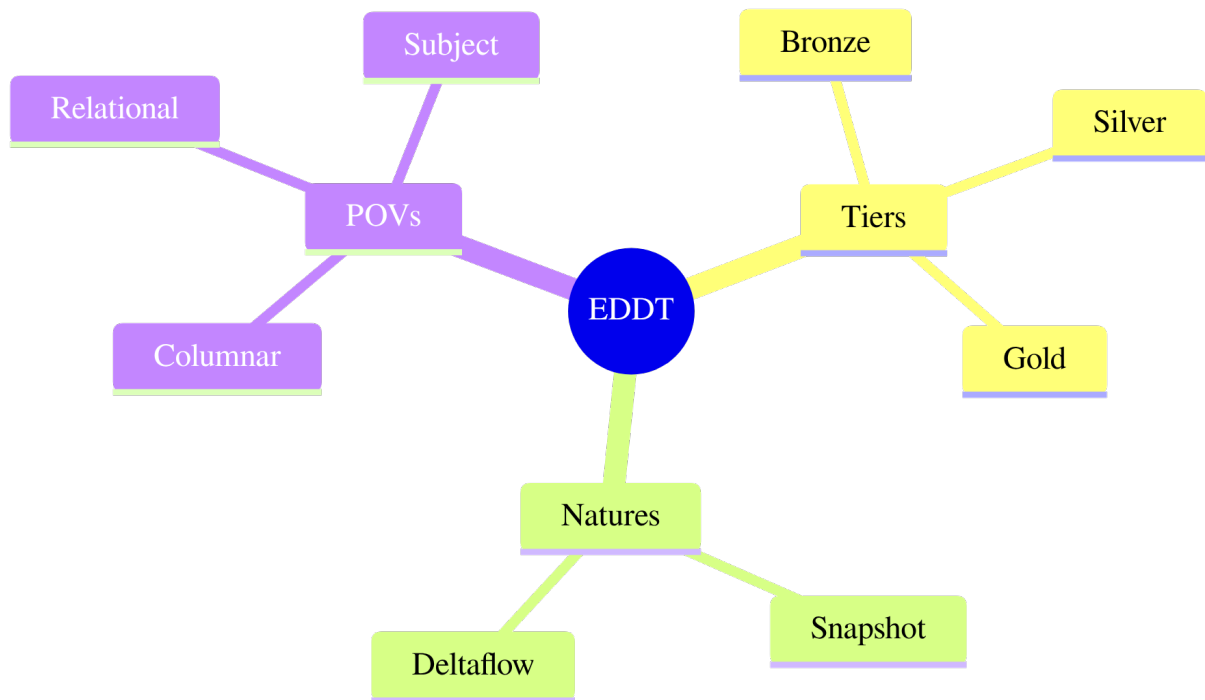

8. Pie Chart

Open-question statuses

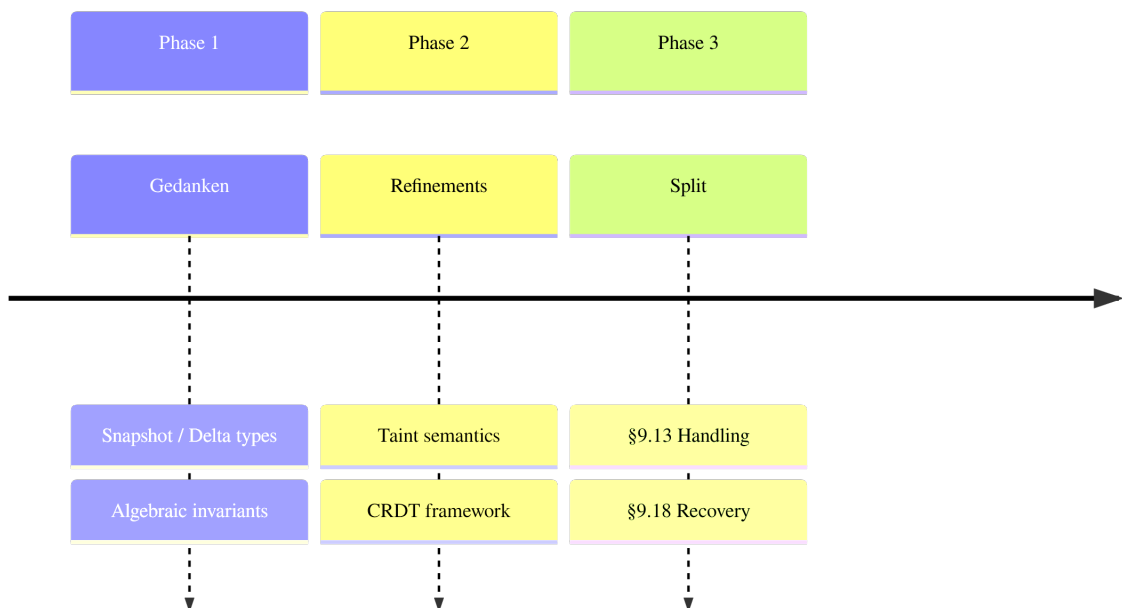

9. Mindmap

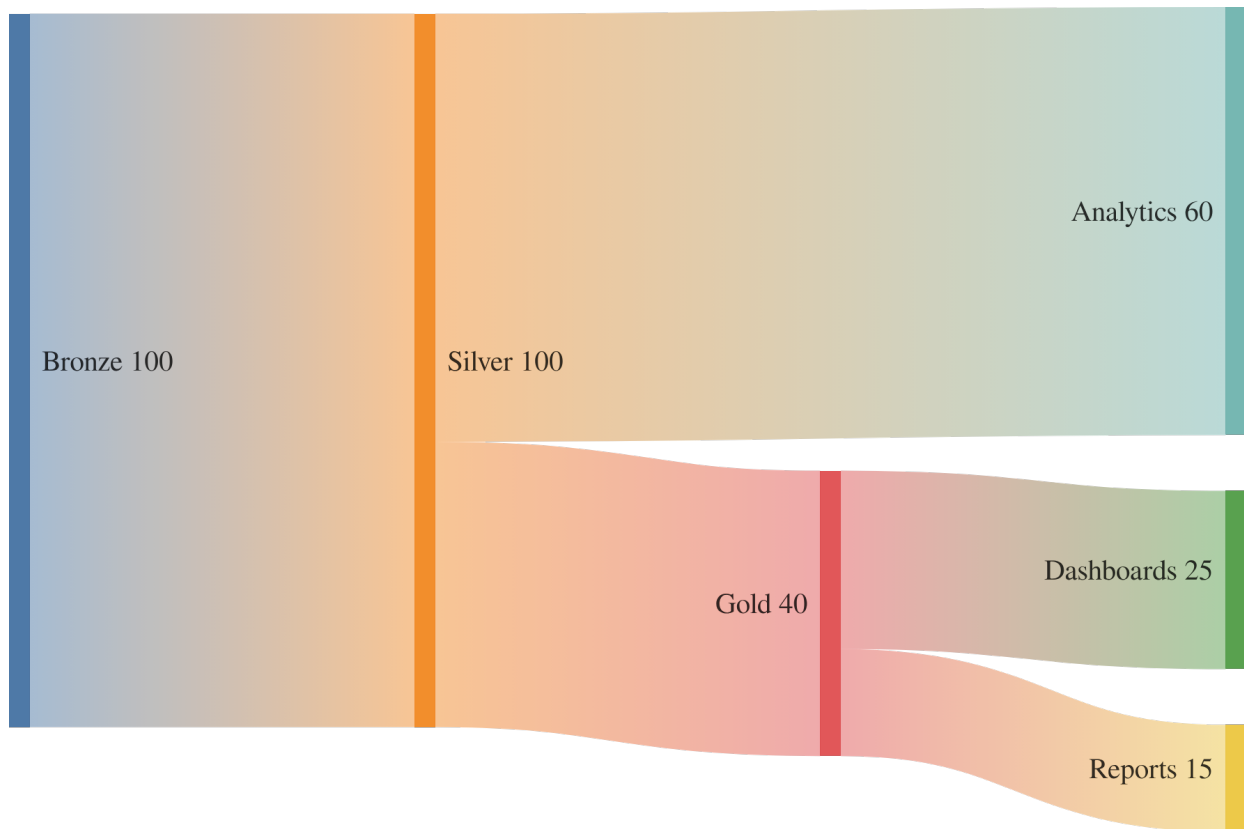

10. Timeline

EDDT investigation progression

11. Sankey Diagram

Closing

All eleven diagrams above should render as images in the PDF. If any appear as syntax-highlighted code, the pre-processor is not intercepting the fence correctly; if any fail to render, `mmdc` returned a non-zero exit code (check `stderr` during build).

The `--no-mermaid` flag can be used to force fall-through to plain code rendering, for offline work or when `mmdc` is unavailable.
